

Migrating a Multi-Million Lines Smalltalk System to Java – A Project Presentation

Udo Borkowski
parcIT GmbH
Cologne, Germany
Udo.borkowski@parcit.de

Abstract: parcIT provides software and methodology services for bank management, risk management and rating procedures. Initially written in Smalltalk the software evolved to a hybrid Smalltalk-Java system with more than 3 MLOC Smalltalk and more than 4 MLOC Java code. We will present how we plan to migrate the software to a Java-only solution.
